Stone: Lundhs Emerald
Stone type: Larvikite
Origin: Larvik, Norway

The Lundhs Emerald plank tiles in a herringbone pattern complement the Lundhs Emerald worktop. The combination creates a stunning focal point in this kitchen. Small or large planks also fit perfectly on floors in many patterns as well as edge tiles, when you want to create a coordinating and easy to maintain finish between your floor and walls.

IMPORTANT INFORMATION

Please remember that proper installation of any specialty product requires a knowledgeable installer. An experienced natural stone installer is suggested. For references visit the Natural Stone Institute website or contact your nearest dealer.

LUNDHS Emerald®

Plank tiles

Lundhs Emerald is the darkest stone in our collection. The stone has a beautiful dark background with lustrous blue crystals and is an excellent choice for interior use. Plank tiles provide you with multiple design solutions that fit well within a variety of different interior styles.

TILE FORMATS AND GROUT COLORS

Just as a wall color can change the appearance of a room, the format and grout color can change the appearance of your tiles. Choose a grout color that goes with the tiles for a uniform appearance, or choose a contrasting shade to highlight color and patterns. See how this kitchen changes appearance with different tile formats and grout colors at lundhsrealstone.com/us/tiles

Surfaces

POLISHED: A high gloss polished surface is smooth and shiny. It gives a mirror-like effect that shows the color of the stone and enhances the lustrous feldspar crystals.

HONED: A honed surface is matt and has a smooth touch. The honed finish makes the surface appear slightly lighter with more subtle crystals than the polished finish.

SILK/LEATHER: The silk/leather surface is structured and matt. The appearance is the same as honed, but with a silky and lightly structured touch.

Natural stone from Norway

- unique and long-lasting surfaces

SCRATCH RESISTANT

Extremely durable and resistant to scratches from daily wear and tear.

ABRASION RESISTANT

The surface will resist abrasion even in high traffic areas such as floors and pavements.

WATER RESISTANT

Extremely low absorption. Resists water and other food-related liquid stains.

UV RESISTANT

Colors will not fade when exposed to sunlight.

EASY TO MAINTAIN

Requires no regular maintenance. Simply wipe clean with warm water and mild soap.

STAIN RESISTANT

Ultra-high density. Resists staining from coffee, tea, oil, wine, and acid etching from citrus fruits.

FROST RESISTANT

The material will resist changes due to thermal shock, and will not expand in freezing climates.

HEAT RESISTANT UP TO 572 °F

Hot pots and pans can be placed directly on the material without any risk of burning the surface.
